DRAGON is a dark chesnut, handsomely marked with a star and snip, and without exaggeration is fully sixteen hands high; he is descended from the best running stock in Eng-land,* and is a brother, in blood, to the famous horse Diomed † whose stock is so highly esteemed in Virginia. It is a fact well known to a number of gentlemen in this state, how de-strous the late Col. John Hoomes, of the Bowing Green, Virginia, was to obtain this horse, and never could effect it until after the death of the late duke of Bedford, who owned him in

England.
DRAGON's a sure foal getter, and all information concur in proving the colts dropped accommodate and tender agreeable the time of seen in America. Lexington, March 30th, 1810. DRAGON was unquestionably the best runand twenty times before he ended his fifth year, and in most cases for the highest prizes in England; among this number was the Whip, (which is known to be the highst object of competition ever established by the English Joskey Club,) and 200 guineas each, against two others, giving them both up a year's weight in riding, four miles; and the famous match against Clifden four miles, carrying fifteen stones (225 lbs.) upon each, in which he was rode by the Duke of Bedford, and Clifden by Sir John

Although Dragon was permitted to go to a few, mares after he was withdrawn from the turf, yet the Duke of Bedford, who owned bim, never relinquished him as a parade horse; and the number of his get which were dropped before the end of the year 1799, only amounts to thirty three—one of these died young, one was sent to America, and several were never trained; eleven winners appear however, in England, from such as have been trained of this little stock, besides that one mentioned to

have been sent to America, which, in the hands of Mr. Tayloe, proved a good runner, and has won several times in Virginia.

Mr. Cookson's Speculator, by Dragon, won g times one year, and 4 times the next, including the Oatland stakes of 50 guineas each, 26 four, also a striped cotton coat, a pair of corded velvet lead coloured pantaloons, also a pair of nankeen pantaloons, with some other clothing:

By the ship United States, capt, Girdon in the very short passage of 25 days from Cadiz, we have received Spanish papers to the 29th ult. They re left in quiet possession, entirely unmolested, and were working constantly in strengthening thew posts. They had com menced a heavy fire upon the Carraccas or paval store, with red hot shot. -Skirmishes between the advanced parties oc-casionally took place, but nothing of any great consequence occurred. The remains of Albuquerque's army, from 8 to 10,000 men, were on the island; about 2000 Eng lish troops, and the same number of Portu-guese, commanded by English officers.— In the town the inhabitants and military spoke confidently of their being able to

LATEST FROM FRANCE.

Yesterday afternoon arrived here, down sound, the French schr. Ant, capt. Revet 30 days from Bordeaux, with wine, brandy &c. bound to Bourbon, put in here with both masts sprung. She sailed on the asth of March, at which time, the American vessels in the ports of France, and at St. Sebastians, still remained under sequestration. The supercargo, however, with whom we have since conversed, says he did not hear of any condemnations. He also says, if we make an honorable treaty with England, there will be no difficulty with France. This gentleman also says that it was understood, that the John Ad ams frigate was detained in England tor Mr. Pinkney's despatches. This cannot be correct, for we have an account by the Juno of the despatches having been sent on board, and of the frigate's sailing for Havie on the 12th of March. He also in forms, that 300,000 French troops had been sent to Spain; but that 100,000 of them had been ordered back. About 20,000 troops were at Bordeaux, quartered on the inhabitants. Bonaparte was to be married on the 25th of March .- A bout four days before he sailed, he heard that a U.S. vessel had arrived at St. Sebastians, with news of the probable removal of the non-intercourse, which gave apparent satisfaction. The ship George Dyer, Cochran, was to sail from Bordeaux about the 1st April for Baltimore, as a cartel with passengers. Another vessel for Baltimore was to sail about the same time with passengers from Rochelle. The capture of Guadaolupe, and the arrival of the French troops opposite Cadiz, was known at Bordeaux.

But fellow citizens, justice compels me to observe, that the custom of the times and the interest of the faculty, have rendered it necessary that a few technical, a few nonvensical, and some mysterious phrases, should be learned by the physician, in order to qualify him for imposing without fear of detection, an almost insupportable burthen of accounts upon toat being, who is so extremely unfortunate or illy advised as to require his presence. That phy sician of the present day, who gets a patient within the sphere of his attraction, and liverates him without first impressing upon his mind an indelible remembrance of bis every feature, of bis insupportable avarice and lack of conscience, departs from the general rule—he is truly a sceptic in the fullest signification of the phrase. The reason of this is, that the laws of the land have been remiss in not limiting the physician's charges; they have committed to leave England for weathen to the regulation of that principle of day the Golconda sailed. ustice, of that benign juggedient of conscience, which the author of nature has been gracious enough to bestow upon mortals generally, and which remains an attentive monitor in the human breast, until effaced by the baneful influence of avasice and oppression-hence the physicians render their accounts in Hyerogliphicitems beyond the comprehension of every thing

How does is happen that voll are so blindly devoted to the cause of a class of men, the summit of whose qualifications, ambition and desires is to rob you in the gloom of incomprehensible mystery of that pittance to which your daily labors or unremitting exertions so eminently entitle you? How clossit happen that the quack, who has merely acquired the use of some technical words, should be suffered to exercise his majevolent imposition without detection ? These circumstances are to me truly marwellous, and almost evince a belief that

And consequently you are easily perceived. And consequently you are enabled to form an estimate of his intrinsic merits, which forever secures you from imposition from that quarter. The reverse is the case respecting the physician. There always has, and forever will bang a mysterious yell between the proposition of physicians, and the successor to Lord Mulgrave, who retires from the mission of physicians, and the successor to Lord Mulgrave, who retires from the mission of physicians and the successor to Lord Mulgrave, who retires from the mission of physicians and the successor to Lord Mulgrave, who retires from the mission of the practice of physicians, and the eyes of the Admiralty.
